

BRIEF TRAINING REPORT (11th-21th JULY 2022) KAMPALA, UGANDA, EAST AFRICA

Course & Date: CFOT (USD900)

11th to 15th July

Certified Fiber Optic Technician (CFOT) – is the FOA certification for general fiber optics applications. CFOTs have appropriate knowledge, skills and abilities in fiber optics that can be applied to almost any job – design, installation, operation – for almost any application – outside plant, premises, manufacturing, etc

Prerequisite: Basic IT skills

Course & Date: CFOS/D (900USD)

18th to 21st July

Certified Fiber Optics specialist Design (CFOS/D)– Certified Fiber Optic Specialist, Design - is the FOA certification for designers of fiber optic communications systems. This is a specialist application certification is intended for technicians involved in the planning, design and management of installation of fiber networks. The KSAs for CFOS/D cover fiber optic network design from concept to completion.

This is a specialist application certification covering fiber optic network design intended for network owners, IT personnel, facilities managers, network designers, estimators or technicians involved in the design or installation of fiber networks. This course is especially recommended for network owners and planners who may not be familiar with the process of fiber optic network design as it can make their jobs easier and their projects better.

Prerequisites: A review of basic fiber optic concepts and components is included in the course for those with no background in fiber optics. A CFOT, CPCT or equivalent basic knowledge of fiber optics and communications networks is helpful in taking this course but not required. Prerequisite Valid CFOT

Training Venue: Namirembe Guest House – Kampala – Uganda

Trainer: FIBERDK #733- FOA Approved Training School.
