

01st- JANUARY 2014

PRESS RELEASE.

HALF DAY - OFS OPTICS - FIBER OPTICS TECHNICAL TRAINING WORKSHOP, SHERATON KAMPALA, - SEVEN HILLS HALL, 9.00AM – 2.00PM, JANUARY 15, 2014

The Workshop that is **fully sponsored by OFS Optics - a world - leading designer, manufacturer and supplier of Optical fiber, fiber Optics cable, FTTx, connectivity and specialty photonics products and solutions.**

The half day Workshop will attract keynote presentations from industry experts, Notably Jacob Ulrik Petersen, Director Business Development Cable / FTTH EMEA, Peter Nielsen, Product Manager and Manuel Hernandez's - Technical Marketing Manager FTTX/OCS- EMEA and George Muhia – Technical Sales Rep in Charge of OFS - East Africa.

Training objectives; Review of Long haul fibers, and proper budgeting techniques, Passive Optical Network (PON) standards, system components, design parameters and benchmarks. This training will also provide an in-depth coverage of the major developments in wide-band, optical cross connect, and waveguide type devices that lay the foundation for next-generation networks.

Recommended Prerequisites: A understanding of basic fiber theory, components, and optical loss budgeting would be helpful but is not absolutely necessary. Also technical professionals seeking to achieve reliable optical choices, smooth Operations at sites, safety compliance, fault finding, assist inspections and last but not the least to accomplish their link goals according to plans.
