Fiber Optics Training, Consultancy & Deployment

FEBRUARY, 2013

OFS OPTIC SPONSORED FIBER OPTICS TRAINING SEMINAR – 25th-28th FEBRUARY 2013, HOTEL AFRICANA, KAMPALA, UGANDA.

Fiber Technologies Limited made exclusive arrangements with **OFS**, a world - leading designer, manufacturer and supplier of **Optical fiber, fiber Optics cable, FTTx, connectivity and specialty photonics products and solutions** to conduct a four day training on proper selection of cable types and installation standards as per the industry specifications and practices.

This unique training was scheduled 25th February 2013 – 28th February 2013 and was **fully sponsored OFS Optic**; it provided high level training experience for the participants different from anything else available in the market place.

This training provided an in-depth coverage of the major developments in wide-band, optical cross connect, and waveguide type devices that lay the foundation for next-generation networks. Participants will study emerging technologies, design alternatives, configuration options, media selection criteria, key parameters affecting system performance, and the underlying theory required for total network design from initial planning to installation issues. In addition to this, Participants were introduced to the latest developments and techniques in the Optical Fiber industry.

Target Audience

It was tailored to technical professionals and company managers seeking to achieve reliable optical choices, smooth Operations at sites, safety compliance, fault finding, assist inspections and last but not the least to accomplish their link goals according to plans.

More important beneficiary of training included Procurement managers, technical managers, site managers and supervisors responsible for management and project implementation.

Presenters.

The training included keynote addresses from **Mr. Jason Pedder** – Director. Product Marketing – OFS; **Mr. George Muhia** – Sales Representative East Africa – OFS and **Mr Ian Gordon Fudge**, a Master Fiber Optics Instructor of the Fibre Optics Professional Association (FOA), Director FiberDK, and a Member of the Fiber To The Home Council (FTTH) – Europe, plus FTTH Council NEMA member of the technical committee and training partner.

Training Partners included

FIBERDK - Your Fiber Optic Training Partner
